RE: Fiber Optic Cable Location Services

Addendum #1, Document # GC-17-034-P

Responses to questions from vendors:

Fiber Optic Cable

1. The approximate annual ticket count is 175-225.
2. Our Dig Safely New York code is Steuben County/DPW
3. We do have utility prints identifying the location of the fiber.
4. We have both paper and electronic format; electronic format is PDF.
5. The fiber is not located in conduit.
6. There is tracer wire with the fiber.
7. The fiber was located and the mapping updated in 2016. The new mapping includes offset location distances from fixed objects. Therefore, the ability to locate the facility can be accomplished in more than one way.

Sewer Line

1. The approximate annual ticket count is 24.
2. The Dig Safely New York code for the sewer line is Steuben County/DPW.
3. We have paper utility prints for the sewer line.

4. The sewer line is classified as a forced main, thus it's pressurized. It is non-metallic PVC. The Bath Electric Gas & Water natural gas line runs with the sewer line and we believe that line has a tracer. If marking before BEGWS, then use line of sight and as-built drawings when necessary.

This information shall become part of the proposal document and should be considered in any response to this solicitation. It is required that this addendum be signed, dated and included with all bid submittals.

If you have any questions regarding this matter, please contact this office.
